

Adapt™

INNOVATIVE ASB

An antimicrobial preservative to preserve finished food contact articles such as food preparation surfaces and polymeric tubing for beverages subject to FDA regulations.

Imparts durable biostatic and antimicrobial activity to surfaces of a wide variety of substrates such as hard surfaces and fabrics subject to EPA regulations.

Adapt™ ASB Antimicrobial

ADAPT™ ASB ANTIMICROBIAL

Adapt™ ASB (subject to FDA regulations) may be applied to food contact surfaces without food type or temperature limitations to include beverage dispensing equipment tubing. Adapt™ ASB is not intended to have an antimicrobial effect on food or water itself.

Adapt™ ASB can be used as a final bacteriostatic finish on multiple surfaces such as door knobs and handles, gloves, cabinetry, and surfaces subject to odor producing bacteria, mold, mildew, and algae: showers, counter tops, fixtures, grout / tile, carpets, equipment, walls, etc.

Partial list of locations for use as an antimicrobial and final bacteriostatic finish: restaurants, kitchens, cafeterias, supermarkets, convenience stores and travel plazas, walk in coolers and freezers, food trucks, meat and vegetable processing plants, food storage and packaging facilities, food transport vehicles, shower/restroom and work out facilities, office buildings, hotels, schools, buses, aviation, trash bins, locations both in or outdoor requiring protection from odor causing bacteria, mold, mildew, and algae.

Partial list of surfaces for use as an antimicrobial and final bacteriostatic finish: appliances and equipment, polymeric tubing for beverage dispensing and processing equipment, building materials and components, conveyor belts, piping systems, food storage containers, water supply lines, pallets, cookware, sinks and counter tops, food wrap, carpet (natural and synthetic fibers), walls, floors, ceilings, fixtures, wood, metals, vinyl, stone, brick, concrete, grout, tile, ceramic, painted surfaces, chrome, stainless steel, plastics, ice machines, water drinking fountains, trash containers, shelves, racks, carts, clothing/uniforms, towels, mats, sealed or glazed surfaces (to include granite and marble) and furniture.

DIRECTIONS FOR USE

Spray Adapt™ ASB over entire area 4 to 6 inches from the surface, allow surface to dry or stand 3 minutes. Wipe with a polishing motion to remove excess product. Test for color fastness on fabrics. Avoid glass or wipe off immediately. Repeat process as needed every 7 to 30 days.
